

# “Bushland baddies, garden goodies” Weedbuster board game

## How to Play

Each player rolls the dice and moves to a square according to the number thrown. You start in bushland, working your way through the catchment towards the sea, encountering facts about bushland baddies and garden goodies along the way. You must throw the exact number to finish your journey and become an official Weedbuster!

4. You talk to a weed expert who identifies local weed species.  
**FREE THROW**

5. Bushland is restored after mining operations by planting non-invasive native species.

6. Weed seeds get stuck on cars and machinery.

7. While on a camping trip you accidentally spread weed seeds.  
**RETURN TO START**

1. Native flora and fauna flourish providing ideal native habitats.

2. Farm animals can get sick and die from eating pest plants.

3. Local mining company chooses to ignore severe erosion and weeds.  
**MISS A TURN**

8. You use a wash down facility to help reduce the spread of weed seeds.  
**ADVANCE 3 SPACES**

9. Wild pigs ruin crops and kill sheep and lambs.

10. Land owner sets traps to control feral animals and protect wildlife.  
**ADVANCE 2 SPACES**

23. You and your fellow students enter the Weedbuster competition and study weeds in class.  
**ADVANCE 2 SPACES**

22. A sly fox enters the house yard, and eats your poultry.

21. Desexing your pet and taking appropriate measures can help keep it under control.

20. Who forgot to make sure the rubbish was secure?  
**GO BACK 2 SPACES**

19. Your pet suffers from contacting or eating weeds. Call the vet!

18. Disposing of weeds and garden clippings responsibly prevents weeds spreading in the environment.

17. School students “Adopt-A-Patch” and hold a community weedbusting bee.  
**ADVANCE 4 SPACES**

16. The local nursery sells only non-invasive plants and plants native to your area.  
**ADVANCE 2 SPACES**

15. The local farming community is affected by wild dogs and foxes who prey on domestic and native animals.

14. Animals such as rabbits are prohibited in the bush because they destroy pasture and cause erosion.

24. Your local creek becomes clogged with waterweeds, choking fish species.  
**MISS A TURN**

13. Pet cats dumped in the bush become feral and prey on native animals.

12. Tractors and farm machinery also spread weeds, making farmland unproductive.

11. Some weeds make you sneezy and wheezy.

10. Land owner sets traps to control feral animals and protect wildlife.

25. Some weeds don't look bad, but they're bad for the bush.

26. Environmental weeds take over natural bushland.  
**MISS A TURN**

30. You accidentally spread weeds on your boots.  
**GO BACK 1 SPACE**
